Mérida, Yucatán, México

Product Manager with 8 years leading teams and 20+ digital products for public institutions, startups, and civil society organizations.

Experience

Technology innovation consultant

2025 – present

I help clients design and implement technology solutions (AI, Data, Methodologies) that optimize the delivery of high-level, high-complexity products or services.

RICAAC Project – FLACSO México

Nov – Jan 2025

- Coordinated multi-level stakeholder alignment (academia, government, NGOs) to consolidate technical knowledge into a single digital asset
- Reduced time-to-market through AI-assisted development (Claude Code), leading from UX definition to frontend implementation
- Implemented security and authentication protocols with AWS Cognito, ensuring data integrity and system operational continuity
- Standardized platform interoperability via Dublin Core and XML, enabling native integration with global library ecosystems

Product Manager · Creai

Jul – Nov 2025

Sole PM responsible for launching Silia, an AI agent orchestration platform, translating C-level vision into a scalable operation and viable product.

- Reduced Silia's pre-sales cycle from 1.1 months to 5 days (85% time savings) by automating 60% of the process with AI and SOP design
- Increased team operational capacity by 440% through a standardized ROI-oriented corporate consulting framework for logistics, BPO, and insurance industries
- Designed 300+ knowledge asset structure via MCP (Model Context Protocol) for customer service agents
- Consolidated the first strategic backlog and 3-month roadmap, prioritizing technical debt resolution and critical features

7 years building data products. Translated complex needs into functional digital solutions while implementing scalable methodologies for remote cross-functional teams.

SIUCAM – National Water Data Platform

2020 – 2024

- Synthesized 40+ heterogeneous datasets into a civic technology platform
- Facilitated collaboration among 50+ stakeholders (government, activists, academics, entrepreneurs)
- Led qualitative accessibility research (usability testing, contextual inquiry) across diverse data literacy contexts

10+ Social Analytics Products and Data Applications

2023 – 2025

- Led development of Web Reports, a visualization suite adopted by 50% of B2B clients, extending average LTV from 12 to 16 months, used by marketing teams at multinational companies, social media analysis teams, and commercial strategy departments
- Launched AI comment classification MVP in 5 days using RAG + prompt engineering for an international fast-food company
- Co-defined and led qualitative field research (ethnography, contextual inquiry) for a food logistics app in northern Mexico

Internal Initiatives

2022 – 2024

- Designed Knowledge Management Program (speed reading, note-taking, communication) with 100% team satisfaction
- Created “Communicate with Documents” framework that tripled documentation output
- Improved asynchronous communication practices in remote teams

Web Design and Communication

2015 – 2018

Strategic Communication Canvas

2017

- Designed and validated a strategic communication framework with two non-governmental organizations
- Created visual tool for mapping communication strategies in social contexts

Corporate and Editorial Websites

2015 – 2018

- Designed and developed complete travel editorial platform with content management system for a client in Greece
- Designed and developed corporate websites for accounting and civil engineering clients in Mexico

Education

Ph.D. in Anthropological Sciences

2020 – 2024

Universidad Autónoma de Yucatán. Prof. License: 15386196. CONAHCYT Fellowship

Bachelor's Degree in Communication Sciences

2010 – 2015

Universidad Nacional Autónoma de México. Prof. License: 14442409. Graduated with Honors
